LOGISTICS 2017-1H

WITH HIKVISION AS YOUR INTEGRATION PARTNER, YOU WILL STAND ON A SOLID FOUNDATION.

RAPID GROWTH

Hikvision is the world's leading supplier of video surveillance products and solutions, featuring the industry's strongest R&D workforce and state-of-the-art manufacturing facilities. In just 15 years, Hikvision has developed from being a single-product provider to a complete product and solution provider and a global market leader.

GLOBAL REACH

- 25 Regional Subsidiaries
- 57% of Employees in International Business Center are locals

BROAD PORTFOLIO

Hikvision's success stories extend over a number of vertical markets. Each year, we add new successes to our list. Still a relatively young company, we continually conquer new applications, building excellence and intelligence into all we do.

Our successful vertical market applications around the world include:

- Smart buildings
- City surveillance
- Parking facilities
- Banking and finance
- Critical infrastructure
- Hotels, casinos, and resorts
- Retail centers and warehouses
- Police, military, and mobile law enforcement
- Education, transportation, healthcare – and more!

FUTURE INNOVATION

Hikvision re-invests upwards of 7% of annual revenue into R&D. We hold over 600 copyrights (100+ increase from 2016) and 1,300 patents (400+ increase from 2016). Of our 20,000 employees, we employ over 8,000 engineers, of which over 2,000 are software engineers.

Hikvision's Research Institute conducts innovative research and development to keep us at the forefront of technology.

- Research topics: Perceptive Technology, Intelligent Analysis Technology, Big Data and Cloud Storage Technology, and Multimedia Technology.
- The largest R&D team in Artificial Intelligence in the security industry.
- Sophisticated experience of video target detection, image segmentation, video structuring and video retrieval.
- Ranked No.1 in Scene Classification at ImageNet 2016 challenge and ranked top in the MOT Challenge Evaluation.

STRONG NAME

Hikvision continues to build close partnerships with distributors, system integrators and installers, as well as third-party technology partners. Today, Hikvision has over 350 technology partners globally.

ECOSYSTEM PARTNER PROGRAM WE SUPPORT YOU ALL THE WAY!

When joining this partner program, you will enjoy access to a wealth of technical and commercial resources, and we ensure that your solution enjoys strategic marketing through our communication channels. You will also get instant access to our entire sales organization. A vital part of our program is the streamlined online communication with our technical teams as well as the tools to plan the go-to-market activities.

PROGRAM TOOLS AND BENEFITS

- **ISAPI** – Hikvision unifies the Application Programming Interface for all products
- **HEOP** – The Hikvision Embedded Open Platform enables you to download and run your applications directly in the cameras
- **Device Simulator** – Simulate communication protocols for testing and development
- **Integration Checker Tool** – Test your applications against the online integration checker tool
- **H-Certification** – Certify your integration/application as proof of compatibility

SMART SOLUTION 2.0 FOR LOGISTICS INDUSTRIES

Merchandise in transit remains crucial to business viability. And safeguarding the flow of commercial goods from the point of origin to the point of consumption—over land, sea, and air—poses some of the greatest challenges for security teams. That’s why Hikvision has a dedicated solution for logistics operations.

Featuring the most advanced security and video surveillance technologies from the number-one solution provider worldwide, Hikvision’s Smart Solution 2.0 for Logistics Centers provides complete, end-to-end systems, tailored to specifics. Whether the concern is material goods, factory equipment, or consumables—or even abstract items, such information—Hikvision covers it. Intelligently.

- Secures entire logistics centers, indoors and outdoors 24/7
- Ensures safety during transportation
- Provides more valuable video information for management optimization

MONITORING PERIMETER PROTECTION

Perimeter areas are often out of the reach of security guards, and are vulnerable to crimes and illegal entry, especially at night. Hikvision's DarkFighter PTZ and Vandal-Resistant Bullet Cameras are the best fit for combining excellent image quality, Smart detections, and Auto Tracking capability.

Traditional camera

DarkFighter PTZ camera

When monitoring extended fencing areas, or when staff privacy issues come up and conventional video resources might go against regulations, Thermal Imaging Cameras are the perfect choice to keep perimeters Smart and safe without breaking any protocols.

Thermal network camera

MONITORING DOCK AREA

Warehouse docks are the busiest areas for logistics centers, with scores of trucks and various personnel handling goods every day. Setting up one standalone CCTV camera on every dock gate to monitor daily operations has been the conventional means for logistics owners to establish surveillance. However, this method has become too time-consuming and ineffective due to installation, recurring maintenance, and total costs.

PanoVu camera

MONITORING WAREHOUSE MONITORING

Poor visibility, expansive indoor areas, the high-resolutions required for parcel tracking – all these requirements and more are met by Hikvision's cameras. From DarkFighter's ultra-low-light camera to 4K resolution panoramic fisheye cameras, Hikvision gives you the most technologically advanced eyes to see like never before.

VEHICLE ACCESS MANAGEMENT

Hikvision Vehicle Access system combines high quality ANPR cameras and back-end devices to create barrier linkage, B/W list filtering and alarm triggering.

*The exact functionalities may vary based on local strategy and product development.

- License Plate Recognition
- Vehicle Detection
- Vehicle Management
- Smart Search / Smart Backup

VEHICLES ON-BOARD SURVEILLANCE

The on-board solution provides monitoring on all-sides of a vehicle to eliminate drivers' blind spots. When trucks back-up or turn a blind corner in the middle of warehouse parking areas with this solution, they have virtual eyes looking in every direction at once.

VEHICLES MOBILE DEDICATED PRODUCTS

All Weather Conditions

Special heating & fan modules for outer-vehicle cameras and mobile recorder operate in all weather conditions.

Reliable Transmission

An intelligent algorithm adjusts the live stream bitrate automatically according to network conditions.

High-Reliability Storage

Featuring fully enclosed with dual-protected HDD and patented aviation airbag, reinforced camera materials with silicone pad for shock absorption, and support for multiple, specialized connectors for vehicles or rail transport.

Power Protection

A wide range of power supplies support the main board of Hikvision's mobile video recorder – from 9 to 32V with short-circuit protection. Mobile video recorder uses high volume capacitors, powering the recorder for 5 – 7 seconds after being turned off so the recorder has enough time to write video to the HDD in an emergency.

Data Safety
Flexible Storage

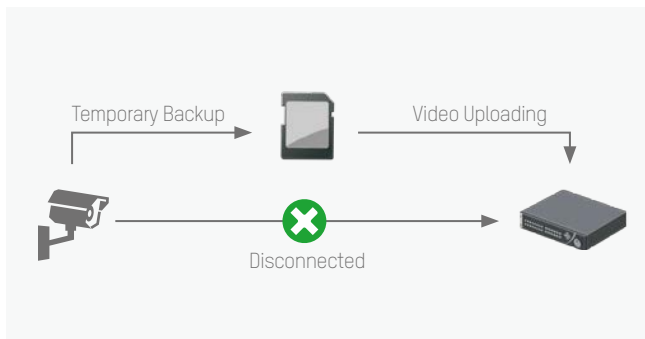

- 2-Layer storage for critical video recording
- NVRs for local storage – Reliable and cost effective
- Centralized storage for key video back-up in the control center

Data Safety
Server Redundancy Design

- Active & standby servers
- "Heartbeat" function automatically backs up users' information if one server is interrupted
- Ensures users' live view and playback in case of failover

Data Safety
Auto Network Recovery (ANR)

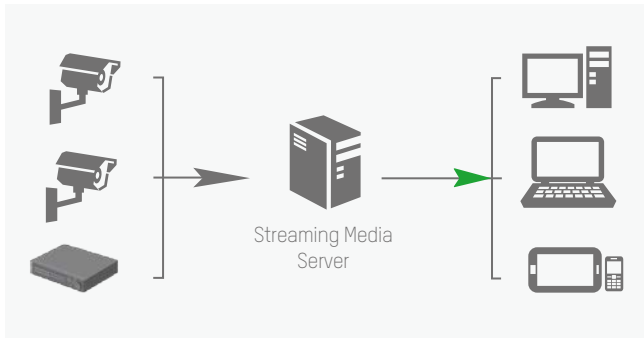

- Auto backup if network connection is interrupted
- Data moves from SD card to back-end device while network connection is restored
- We recommended using Hikvision brand Micro SD card for ANR storage

Data Safety
RAID & N+1 Failover

- **Single-spot storage backup:** Multi-RAID supported by embedded NVR and Storage Server
- **Multi-spot storage backup:** When any active NVR is out of service, the standby NVR can take over recording automatically

Transmission Optimization Streaming Media Server

- Hikvision Streaming Media Servers enable multiple users to view live or playback the same camera using only one channel of bandwidth transmission
- 1 Streaming Media Server supports up to 200 x 2 Mbps video data streaming and up to 200 channels

Large Data Management Smart Backup

- Supports event footage backup
- Saves maximum storage space
- Fully compatible with Hikvision Smart IP Cameras

Smart Search

- Easy and quick event search for snapshots and video recording
- Plays back the target event footage at standard speed and can fast-forward (up to 16x)
- Unrelated video can be skipped during playback

Centralized Management Security Operator Authority

- Centralized management of security personnel and authorities
- Security personnel have assigned authority levels, such as live view, playback, area cameras, or PTZ control
- Higher permission-level users have priority control over the system, i.e., they can takeover PTZ control, force the logout of lower-level users, and more

Centralized Management Alarm Verification and Handling

- Various types of events trigger real-time alarms and notifications to security operators, like motion detection, line crossing, intrusion detection, face detection, etc.
- Alarm flashing in E-Map notifies security operators
- Alarms link to predefined cameras in the form of pop-up images/video for visual verification
- One-check-all mechanism allows one user to handle alarm events while others get notifications

Embedded 4K NVR
4K

- Maximum 320 Mbps bitrate Input
- 200 Mbps bitrate input (RAID enabled)
- Supports 3rd party network cameras
- Up to 12 MP resolution recording
- Supports H.264/H.264+, H.265 video formats
- Supports RAID 0, 1, 5, 6, 10
- Supports redundant power supply
- I8: 8 x SATA; I16: 16 x SATA

iVMS-5200 Professional
Video Management Platform

- Centralized device & user management
- Maximum connected devices per CMS: 1,024
- Support RSM to control 5 CMS for large system
- Number of users per RSM: 100
- Up to 16 web clients
- Up to 24 mobile clients
- Supports 3rd party integration via ONVIF & SDK
- Additional add-on modules:
ANPR: Automatic no. plate recognition
Transaction: POS integration + CCTV footage
Business Intelligence: People counting, heat mapping and retail traffic analytic
GIS: Vehicle tracking, GEO fencing

Blazer Pro 128/256
High Video Management Platform

- Ready to use, preinstalled with Hikvision professional VMS and windows 8.1 centralized device & user management
- Up to 256 channels access licensed
- 2-board design – 1 board for VMS, 1 for storage, resulting in higher reliability
- Embedded decoding capacity, support for 2x2 screen displays – a more economical solution
- HDD hot swapping with RAID 0, 1, 5, 10, N+1 equipment hot spare ensures data reliability
- Control client / Web client / Mobile client support
